

AUGUST, 2007

For Immediate Release - OPENING IN SPAIN, SUMMER OF 2007 !!!

Valentini's Custom Wine Cellars is pleased to announce their expansion to Madrid, Spain having reached an agreement with AI Fuentes to represent Valentini in Spain and develop a market with great potential. Both professionals will work together to ensure the same quality services and cellars that Valentini is known for. See our Spanish website at: [www.dragoncellars.com](http://www.dragoncellars.com). Spain has been producing and consuming wine for ages yet there is just recently a move towards establishing a culture for proper wine care and storage. Demanding and exclusive clients both Spanish, as well as the vast foreign market, is looking for a company that can provide "turnkey" solutions that are technically correct and result in beautiful and innovative custom cellars. Kathleen and AI will ensure that this niche is catered to.

As a nationally recognized expert in the planning, design and execution of custom Wine cellars for over 10 years, Kathleen Valentini has raised the bar for wine cellars of all sizes and types throughout the country by incorporating both the technical requirements for storage and the aesthetic needs for a beautiful wine environment. "I work with each client from design to installation to create a cellar that meets the aesthetic needs and budget to protect and enhance the sizable investment of demanding wine collectors." Kathleen's custom designed cellars have been featured in numerous national publications, featured in table top book entitled "*Wine Cellars – An Exploration of Stylish Storage*", (Schiffer Publishing Ltd), "Custom Home", "Unique Homes", etc. She has also appeared on television and international radio as a subject matter expert in her field and had the first wine cellar website in the mid-1990's.

"The collectors deserve to have the kind of expertise we bring to the table in all aspects of consulting, design, construction, management and proper climate control," notes Kathleen. "There is so much more to the proper storage and enjoyment of wine than simply putting racking in a room. We are here to help our clients with all aspects of the process and in the end, ensure that their investment is protected."

As the President and designer of Valentini's, Kathleen is intimately involved with the assessment of her client's design needs and works to meet them in unique and pleasing ways. Valentini's expanded management, refrigeration and construction team are responsible for seeing that all of the technical and logistical issues are handled on each project flawlessly "because our clients expect and deserve the highest level of customer service available. This approach has made us successful in other areas of the country and as far reaching as Spain."
